

ATTITUDE AND WORK ETHIC REFLECTION

Why should you put in a hard day's work, day in and day out, when fellow coworkers receive the same pay for doing less?

I believe that putting in a hard day's work is about more than just earning a paycheck. A strong work ethic reflects personal integrity, responsibility, and pride in the quality of work produced. Even when coworkers may do less and receive the same compensation, maintaining a high standard of performance allows me to continue developing valuable skills and building a positive professional reputation. Employers often recognize employees who consistently demonstrate reliability and commitment, which can lead to future opportunities such as promotions, leadership roles, and professional recommendations. In the long run, the habits developed through hard work benefit both personal and professional growth. (Word Count: 98)

What is the bonus for working as hard as possible and striving to be a model employee?

The greatest reward for striving to be a model employee is the trust and credibility that develops over time. Employees who consistently demonstrate professionalism, dependability, and initiative often become the individuals supervisors rely on for important projects and responsibilities. These experiences provide opportunities to learn new skills, expand professional networks, and gain valuable references for future career advancement. In addition, working hard contributes to personal satisfaction because it creates a sense of accomplishment and confidence in one's abilities. The long-term benefits often outweigh any short-term recognition or rewards. (Word Count: 86)

Which work ethic characteristic do you feel is one of your strengths? How have you exhibited that characteristic in and outside of a professional space?

One of my strongest work ethic characteristics is initiative. I enjoy taking responsibility for tasks and looking for ways to contribute beyond what is expected. During my public health coursework and internship preparation, I have consistently sought opportunities to gain additional experience through volunteer activities, community engagement, and professional development. Outside of professional settings, I demonstrate initiative by helping organize activities, solving problems independently, and seeking opportunities to improve my knowledge and skills. This characteristic helps me remain proactive and adaptable in a variety of situations. (Word Count: 89)

Which workplace trait is something you could work on? How can you practice these traits in and outside of a professional space?

One workplace trait I would like to improve is confidence when communicating ideas in group settings. While I am comfortable completing tasks independently, I sometimes hesitate to share my opinions when working with larger groups. To improve this skill, I can practice speaking more frequently during meetings, class discussions, and community events. Outside of professional settings, I can build confidence by participating in volunteer activities, networking events, and leadership opportunities that require public speaking and collaboration. Developing

stronger communication skills will help me become a more effective health educator and advocate. (Word Count: 95)

TED TALK REFLECTION

How can you develop your performance currency and relationship currency to help you get a sponsor?

To develop performance currency, I will focus on producing high-quality work, meeting deadlines, and demonstrating reliability throughout my internship with Walk & Roll Long Beach. By contributing to community outreach events, health education activities, and program evaluation efforts, I can build a reputation for being dependable and effective. To develop relationship currency, I will actively engage with supervisors, staff members, community partners, and stakeholders. Building positive professional relationships through collaboration, communication, and a willingness to learn can help establish trust and credibility. Together, strong performance and meaningful professional relationships can increase the likelihood of finding a sponsor who is willing to advocate for future career opportunities. (Word Count: 110)

30-60-90 DAY PLAN

Position: Community Health Educator / Health Promotion Specialist
Organization: Walk & Roll Long Beach

DAYS 1–30

Focus:

Learn organizational programs, community partnerships, safety education initiatives, and active transportation goals.

Priorities:

Complete onboarding, understand program objectives, observe community events, and learn data collection procedures.

Learning Goals:

Goal 1: Learn Walk & Roll Long Beach's mission and program structure.

Metric: Complete orientation and review all program materials.

Goal 2: Understand bicycle and pedestrian safety education strategies.

Metric: Attend at least three educational activities or events.

Goal 3: Learn community outreach and engagement procedures.

Metric: Shadow staff during two outreach activities.

Performance Goals:

Goal 1: Assist staff with outreach preparation.

Metric: Support at least two community events.

Goal 2: Create educational materials.

Metric: Develop one flyer, social media post, or outreach resource.

Personal Goals:

Goal 1: Build professional relationships with staff.

Metric: Meet individually with at least three team members.

Goal 2: Improve communication skills.

Metric: Participate actively in team meetings.

Goal 3: Develop confidence interacting with community members.

Metric: Engage with participants at every outreach event attended.

DAYS 31–60

Focus:

Increase involvement in community outreach, health education, and program implementation.

Priorities:

Participate in community events, assist with education programs, and support evaluation activities.

Learning Goals:

Goal 1: Learn event planning procedures.

Metric: Assist with planning at least one community event.

Goal 2: Understand evaluation methods.

Metric: Review participant surveys and evaluation tools.

Goal 3: Learn how community partnerships support public health initiatives.

Metric: Attend one partner meeting or collaborative event.

Performance Goals:

Goal 1: Lead portions of community outreach activities.

Metric: Facilitate one educational activity.

Goal 2: Collect participant feedback.

Metric: Gather feedback from at least 25 participants.

Goal 3: Assist with program reporting.

Metric: Contribute data to one evaluation report.

Personal Goals:

Goal 1: Improve public speaking skills.

Metric: Deliver one educational presentation or event introduction.

Goal 2: Strengthen teamwork abilities.
Metric: Collaborate on at least two projects.

Goal 3: Improve time management.
Metric: Complete all assigned tasks by deadlines.

DAYS 61–90

Focus:
Demonstrate independence and contribute meaningful recommendations for program improvement.

Priorities:
Lead projects, analyze data, evaluate outcomes, and contribute to long-term program goals.

Learning Goals:
Goal 1: Understand how public health programs measure success.
Metric: Complete one program evaluation summary.

Goal 2: Learn advocacy strategies for active transportation.
Metric: Participate in one advocacy or community planning activity.

Goal 3: Expand knowledge of injury prevention and health promotion.
Metric: Review and summarize current best practices.

Performance Goals:
Goal 1: Independently support a community event.
Metric: Manage assigned event responsibilities successfully.

Goal 2: Complete a final project or presentation.
Metric: Present findings and recommendations to staff.

Goal 3: Contribute recommendations for program improvement.
Metric: Submit at least three evidence-based recommendations.

Personal Goals:
Goal 1: Demonstrate leadership skills.
Metric: Take ownership of one project or initiative.

Goal 2: Expand professional network.
Metric: Connect with at least five public health professionals.

Goal 3: Prepare for future employment.
Metric: Update resume and obtain professional references.
